### CAREER PROFILE SUMMARY

---

I am a passionate IT enthusiast with an understanding of various elements of IT-related technologies and keen on growing as a professional. Through the course of my experience, my key skills in IT include but are not limited to; technical support, economics, network administration, network security, system administration, operating systems as well as troubleshooting and maintenance. Highlights of my experience include; installation of different operating systems on computers. (Windows and Linux Platforms), performing installation of required software as per the client's requirements, the configuration of networking devices, designing, implementing and commissioning of websites. I am flexible and can work in high-pressure environments and still deliver excellent results. Moreover, I also have excellent customer service skills. My goal is to develop my career in a company where my skills and experience will be utilized to contribute to the growth of the organization as an IT Officer.

---
